ABSTRACT OF THE DISCLOSURE

APPARATUS AND METHOD OF GENERATING AN XML SCHEMA TO VALIDATE AN XML DOCUMENT USED TO DESCRIBE NETWORK PROTOCOL PACKET EXCHANGES

5

A method, system and apparatus for generating an XML
10 schema are provided. To generate the schema, transition
states of the packets have to first be identified. Then,
based on the transition states to investigate, the schema
may be generated. The schema contains all the rules and
definitions needed for validating an XML document.
